

NEWDAI INC. BERLIN FOOD EQUIPMENT COMPANY

Frequently asked Questions about our Wall Systems.

Question #1:

Why choose a modular wall system over conventional building techniques?

Answer:

Modular wall systems are extremely flexible and are easily modified to fit new accommodations to a space Without costly downtime, demolition, and waste of conventional building products and techniques. In almost all cases our wall systems can be pre-manufactured to fit your exact space before installation cutting your on-site Demolition and installation time in half. All the wall systems are also a 100% recyclable product.

Question #2:

How durable are the wall systems?

Answer:

All of our wall systems are made from high grade stainless steels with a variety of types to choose from Depending on your application. Some of these include high caustic and corrosive areas, to low level and light duty areas. Each system is also designed to withstand years of wear & tear and abuse from Lab carts, cages and material handling equipment.

Question #3:

How do I determine what the best material and thickness are for my application?

Answer:

Many factors will contribute to the design and fabrication structure of your wall system. One major factor will Include the types of materials and chemicals that may come into direct contact with your wall system. Also the Height and insulation value that is required in areas with a high decibel level. During your initial consultation A trained Berlin representative will help guide you through your options that are available and help you Make the best decisions for your facility.

Question #4

What if I want to add a piece of equipment later?

Answer:

Adding equipment is a snap with the wall systems. Panels can be removed for the new piece of Equipment that is required and a new set of panels that fit up to the specified equipment can Be reinstalled with ease. Most of the time these panels can be pre-fabricated and shipped To the customer to install with the pre-assembled compression lock system. This also includes mechanical Doors, pass throughs, vented paneling, viewing windows, and various access panels.
